

AIR-EXCEL Offset Blanket

MC740

MC740 blanket has been developed with New ThermaSphere Technology.[®]

Characteristics

1. Excellent dot reproduction
Newly developed surface material enhances print performance.
2. Longer Life and Stability
Specially designed carcass allows stability and enhanced press life.
3. Improved Shock Absorption
Newly improved compressible layer with ThermaSphere Technology[®] easier resists smashes and damage of the blanket.

Technical Data

Surface

Rubber Compound	For normal ink type
Finish	Polished
Color	Blue

Construction

Compressible Layer	Closed Cell
Nominal Thickness/ Ply	1.95/3Ply

Application

Sheet fed Presses
Card Board Printing

Physical Property of 1.95mm Type

Thickness	1.93 to 1.98mm
Tensile Strength at Break	90N/mm<
Elongation at Break	approx. 5%
Elongation at 500N/50mm	1.0%>
Roughness <R _a >	approx. 0.6μm
Micro Hardness	approx. 56°
Compressibility	Medium

AIR-EXCEL Offset Blanket

MC740

**A New High Performance
Sheet Fed Blanket.**

**New Kinyo
ThermaSphere Technology®**

New Kinyo ThermaSphere Technology® with the revolutionary compressible layer enhances print quality on a large variety of printing presses using all type of paper stock.

Product characteristics

- Excellent dot reproduction
- Longer life and Stability
- Improved Shock Absorption
